
How to disable JQuery?

Posted by lalipas - 2008/02/14 18:17

Guys,

I can say that you are geniuses, since you have been able to disable the JQuery for fireboard forum.

Can you guys tell how you did that?

I would really appreciate this. I will post your solution to Yootheme forum as well, since there are people there who are struggling with this issue as well.

Thank you in advance.
