
Do you have anything that will work with 1.5joomla

Posted by bigjoe - 2007/11/26 21:43

Moolet Total Users 1.0.9

Do you have anything that will work with 1.5 Joomla I legacy 1.0 turned on. I was looking for a mod that will work with 1.5 to keep track of online users ? I have installed the Moolet Total Users 1.0.9 and I get error Fatal error: Cannot redeclare class jconfig in ect ect on line 2

Anything would be helpful thank you

bigjoe,
I actually have not followed Joomla 1.5 much. My plan was to make all the moolets load on that sytems as I do believe it to be very very important. However I landed a super duper intesnse project that has all my time locked through December. I would hope in January that I could have all the moolets converted.

did you check the extensions.joomla.org site using the search ?

brian

Hi!

Are there any news regarding this topic? I encountered the same error with "Mod Moolet Fireboard Who's Online & Stats 1.0.4" - and I am looking forward to use your ingenious modules with Joomla 1.5. ;)

Kind regards, Jens

This is completely our fault. out work load has us running 16 hour days so we have not found time to do this. Be we agree it is way past time.

super sorry, hopfully soon.

Hi!

Thank you for your prompt and kind reply.

"Fault"?! I don't think so.

It is great to hear that you want to support Joomla 1.5 soon/in the future.

All the best for you and all your projects...
