
Reload main site inside module

Posted by Escabar - 2008/03/05 22:01

Good evening everybody,

After hardcoded the path to the modules folder of my website the whole site will reload itself in the module of moolet total users 1.x.x

any idea what the problem is?

Its obvious ive unpublished this module for the time being.

you would need to publish the module to a page and send us the URL to the page for us to do any kind of trace on that.
