
can I write the company name

Posted by meister2000 - 2008/03/07 17:55

Hello,
when I write in maps.google.com the
company name, street, city
it works.
But when I write in Moolet Google Maps it says that the adress is wrong.
When I write street, city it also works.
But I want to write the company too.
Thanks a lot.

Hello,
the page is on my local machine, but look on
http://chaila.net/index.php?option=com_d3000&Itemid=199
then type in
lenbachplatz 7a, 80333 MÃ¼nchen
this is the BMW Pavillion
an then type in
bmw pavillon, lenbachplatz 7a, 80333 MÃ¼nchen
Adress not found.
But at google maps, all of these addresses works without problems.
Thanks a lot for your help

I see two problems right off the bat. Please read previous posts about multiple mootools files in your tempplate. you can only have one or the second will wipe out functions set up by the first.

that needs fixed!

second is you have the country code in the map set to US and you are not passing a US address

maps?f=q&hl=us

see the "us" in the URL string...
