okay,  
seems the path was wrong to the files.

try now and please let me know if you can not get to them

I know what its like to needs some moolets

---

Seems to be more corruption..  
I spread them accross two sections for now and got most back

Still tracing down the system corruption.  
I put each one in its own category for now and the brought them back up.

do not how long that will last
