
Thank You!

Posted by bituin - 2008/07/11 07:31

I didn't know where to thank you guys so I posted here. Hope you don't mind.

I'm new to mootools, and haven't actually installed it on our live Joomla site yet because I was afraid to mess things up. Thank you for creating this website, it makes all fired up and excited to try all the possibilities for website interactiveness that I could copy, hehehe! :-). By the way, my Avatar is a photo of my little baby boy, Jude.

Again, thanks and more power to the Moolets community!
