
Firefox - expand link

Posted by jagy2a - 2008/08/15 00:43

Hi,

The module is great, thanks! The Google map show just fine in IE but in Firefox there's a problem: when you click the expand link, the lightbox opens under the menus.

I have Joomla 1.0.14
Windows XP

the link is <http://www.maisonducorail.com//situation.html>

I'd like to add the errors that Firefox console give me regarding this page:

Error: b has no properties

Source File: http://maps.google.com/intl/en_ALL/mapfiles/122b/maps2.api/main.js

Line: 1272

```
0);if(b.Ax(>a.l())b.Ws(a.l());this.yj());
```

Error: b has no properties

Source File: http://maps.google.com/intl/en_ALL/mapfiles/122b/maps2.api/main.js

Line: 1272

```
0);if(b.Ax(>a.l())b.Ws(a.l());this.yj());
```

Error: this.fireEvent is not a function

Source File: <http://www.moolets.com/includes/js/mootools.v1.11.js>

Line: 3

I hope someone can help with this issue. Thanks

Hello,

The page no longer exists, can you send a more recent URL?
