## Firefox - expand link

Posted by jagy2a - 2008/08/15 00:47

Hi,

The module is great, thanks! The Google map show just fine in IE but in Firefox there's a problem: when you click the expand link, the lightbox opens under the menus.

I have Joomla 1.0.14  
Windows XP

the link is <http://www.maisonducorail.com//situation.html>
