
Locavore Community and Geolocate Product Index

Posted by spiney - 2008/08/26 05:03

www.Locollectual.com is a very nice online community of Locavores and localtarians that helps you lower your carbon footprint. The site uses the mod moolet online avatar bar and the fireboard who's online modules.

This is a very good cause and well worth signing up for to find companies and products that are made close to home. Save on shipping costs, save on gas, save the planet!
