
Warning: main(/modules/mod_moolet_total_users.....

Posted by malou - 2007/09/05 06:39

hi,

I'm having some problem after "loading", I got a warning:

Warning: main(/modules/mod_moolet_total_users/language/english.php) : failed to open stream: No such file or directory in /home/betataue/public_html/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 26

Fatal error: main() : Failed opening required '/modules/mod_moolet_total_users/language/english.php' (include_path='.:usr/lib/php:usr/local/lib/php') in /home/betataue/public_html/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 26

Could anyone have the same problem like this?..Really needs help about this one..

Tnx

Posted by krossi - 2007/09/05 06:45

I'm having the same problem:

Warning: main(/modules/mod_moolet_online/language/english.php): failed to open stream: No such file or directory in /home/content/R/o/s/RossiQueenBee/html/modules/mod_moolet_online/mod_moolet_online.inc.php on line 65

Fatal error: main(): Failed opening required '/modules/mod_moolet_online/language/english.php' (include_path='.:usr/local/lib/php') in /home/content/R/o/s/RossiQueenBee/html/modules/mod_moolet_online/mod_moolet_online.inc.php on line 65

But my problem seems to be on line 65

There will be an updated version of this module this week that has a field for the path of your language file.

Tha will correct it, or you can just go into that file and hard code if for now if you like. Update should be inline Friday sometime

Hi moolet fans,

I am still testing joomla @ localhost I don't have language probs.

but it means...

Moolet Total Users 1.0.8

Warning: mysql_fetch_row(): supplied argument is not a valid MySQL result resource in
C:\xampp\htdocs\my_joomlasite\modules\mod_moolet_total_users\mod_moolet_total_users.inc.php on line 179
so what should I do look in mysql?
or the line 179? little confused about this.
make experience as Newbie!

(maybe it's just while I make it @ local)

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by brian_williford - 2007/09/16 14:41

Well, it is really, really hard of me to dig if I can not view your site, which at "localhost" would not be an option.

I can tell you that block of code goes to Community Builder and gets the Avatar if it exists, or a dummy image if it does not.

Can you do two things:

- 1) What version of Joomla and what version of CB?
- 2) Can you paste back or PM me your url, even though I can not hit it I would like to see the structure

brian

pretender8210

You will need to upload an avatar before we offer help and then we will need a url of the site where the moolet is posted.

http://www.moolets.com/component?option=com_fireboard/Itemid,131/func,view/catid,5/id,552/#552

Hi, IÂ´m having the same problem

Warning: main(/modules/mod_moolet_total_users/language/english.php) : failed to open stream: No such file or directory in /home/.targa/damagedrose/goto-hell.net/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 51

Fatal error: main() : Failed opening required '/modules/mod_moolet_total_users/language/english.php' (include_path='.:usr/local/lib/php') in /home/.targa/damagedrose/goto-hell.net/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 51

My domain name is http://goto-hell.net
and my joomla version is Joomla! 1.0.13

How can i fix this?

marinalobo

I did not see the moolet published on a page so I can not check with Firebug to see whats up

if you can publish the moolet to a page that is not important and sene me that URL

thanks

=====

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by marinalobo - 2007/10/31 17:33

But the error will appears to everbody see?

=====

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by brian_williford - 2007/10/31 17:40

It is normally recomended when installing a new Joomla componenet or module to create a new page for testing, not use a public page. If the public does not know it is there they will not be hitting it.

If you can create a new page and send me the link I will look at it. If that does not work there is nothing I can do.

=====

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by marinalobo - 2007/10/31 17:47

well i donÂ´t know how to do that yet
i publishe here

http://goto-hell.net/

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by brian_williford - 2007/10/31 17:54

okay, you can turn it off, which may be hard to do with those devel ears!

Looks like your PHP is not up to speed and that moolet will not work. Your host will not allow the language file include on the AJAX call.

You can use a moolet without a language file, MAYBE. Like moolet whos online LITE.

not the regular version

sorry!

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by marinalobo - 2007/10/31 18:05

there's any moolets here in your site that i can use or just moolet whos online LITE ?

Re:Warning: main(/modules/mod_moolet_total_users..

Posted by brian_williford - 2007/10/31 21:21

I honestly can not remember which ones do and do not have language files.

I know the Dogear should work but that is not a high demand item
