Hey.

How can i get the same user stuff as on this site to my owne joomla site?

I mee the possibility to upload userfoto, and seeing other users profile, and so on. Just like on this site?

Thanks a lot.

Well, you go the the "Moolets" link, dowload the moolets Joomla modules you want to use. Then log into you Joomla admin and to go:

Admin > installers > Modules

install the modules and set them up. If you are unfamiliar with this process you might want to go over the documentation at Joomla.org
