
error mssage

Posted by imbahexer - 2007/10/04 10:57

hi i have installed your mod moolet total users 1.0.8. but wenn i plubish it i became a error message in the box on the front page. here is the error message:

Warning: main(/modules/mod_moolet_total_users/language/english.php): failed to open stream: No such file or directory in /hp/ac/ae/ra/www/Joomla/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 51

Fatal error: main(): Failed opening required '/modules/mod_moolet_total_users/language/english.php' (include_path=.::/etc/php:/usr/local/share/php4.4:/usr/local/share/php:/usr/share/php4.4:/usr/share/p hp4:/usr/share/php) in /hp/ac/ae/ra/www/Joomla/modules/mod_moolet_total_users/mod_moolet_total_users.inc.php on line 51

i hope you can help, i love your mod and its very nice.

sry for my english but iam from germany and my english is not the best.

gotta have a url to the site with the module published to a live page to help.

thanks

your site is in a subdirectory and you did not add it to the module admin

"Joomla/"

module is looking for:
/modules/mod_moolet_total_users/language/english.php

when it is at:

Joomla/modules/mod_moolet_total_users/language/english.php

still not finding itself, I hope it is not the upper case "J" in the path. might keep those lowercase in the future..

Try adding a slash in front of the J

change
Joomla/

to
/Joomla/modules/

=====

Re:error mssage

Posted by imbahexer - 2007/10/04 18:34

hy again i hav e added a slahs before the J but now a have the same error message again. can you tell me what i have to do pls?

Re:error mssage

Posted by brian_williford - 2007/10/04 18:46

your error says you have two slashes not one,
are you shure you added /Joomla and not //Joomla

of so i cant do much more I can do, ever server is different and dealing with subdirectories can be a big mess

why is your site not at root?

hi

i have adde 1 slash not 2. and i maked a folder at the start off the server called i think when i in the future will install a second joomla i can better make it so. but now 1 have only the joomla and one picture galerie running on the server. i testing it all the time with the slash.

sry i dont mean the end i mean at the start it was here
require_once(\$mosConfig_absolute_path."/". \$moolet_language_path);
ther i deleted the /
