If you guys need help with getting your mySQL settings for your site up to snuff you might post on the help needed forum. That is beyond what we do here

Thanks

Hmmm, this is of interest to me too, I'm getting the same problem...

Warning: mysql_connect() : Access denied for user 'academy'@'localhost' (using password: NO) in /home2/academy/public_html/site/modules/mod_moolet_online_lite/mod_moolet_online_lite.inc.php on line 61

I realise this is probably a schoolby error somewhere along the line, but this is a plush mod and I want to make it work!

Any ideas greatfully received.. :unsure:

Hello,
Normally this error means you are on a shared host, and one security settings in the servers php.ini file that are to strict for the AJAX call to allow the called page to log into the database.

The called page gets the username and and passord from joomla but the hosting provider rejects this.

You can switch hosts or simply crack open the php file in the odule that has the database call and hardcode your username and password

not so advised from a security point of view but works

sorry about that, nothing I can do

I have this problem too..

Warning: mysql_connect() :
Access denied for user 'apache'@'localhost'
(using password: NO)

How can i solve this problem.. and if necessary how to crack the php file? Example..? How do i have to change the code?

Or do u really not recommend it?
