
Recent Visitors Module

Posted by lee - 2007/10/17 05:30

Brian,

Just picking up from a topic on another board regarding the 'wish' for an amendment to the recent visitors module.

See thread:

http://www.moolets.com/component/option,com_fireboard/Itemid,131/func,view/catid,17/id,571/#571

Also get your poin about Saturday's and very much know the feeling. Still saying that the last few Saturdays have been pleasurable - watching England win the rugby. World cup final this weekend - bring it on !!!

Anyway back to this note. Was wondering on your thoughts about the inclusion of 'all visitors' regardless of their registration status for this module.

Like I indicated in the previous thread, I reckon that having the ability to switch on either all or registered would be good, especially for those sites that are just starting out. The recent visitors module, may look like a 'wanted' poster until the community gets going
:laugh:

Still happy to hear your thoughts.

Thanks

Lee

Lee,

Thanks for moving this here. I understand about wanting the unapproved avatars in addition to the approved ones. That is an easy change.

I though I also read you wanted unregistered users which I did not understand. Unless that was from another thread. If a user is unregistered we no nothing about them to put in the block. Unless what you mean is to just put up the blank no avatar image for every "Visitor" that is currently on the site. Which too would be easy enough.

Please clarify that if possible.

thanks, and thanks for uploading an avatar!

brian

Hi Brian,

Well it was 3am in the morning when I wrote that, at the end of another crazy day, so you're probably not the only one that was a little confused !

Thinking about it, anything that helps out a community site in it's early days would be good. In other words anything that would appear to make the site look busy whilst it's establishing.

So on that basis I would probably include registered users regardless of their avatar status i.e. no image, pending image or custom avatar.

If there is also a way to capture 'visitors' as well then thats all the better in my book. Although once the site is established it would be good to show just registered users (as described above), so if there was a switch to show all, or just registered then that would be a bonus.

Cheers

Lee

Lee,

I made the change to moolet recent visitors, try version 1.0.1

You should now have a pull down to allow member with avatars or all members.

let me know if this works

thanks

brian

Hi Brian,

Sorry about the delay - promised myself that I wouldn't do anything over the weekend, and the failure for England to win either the rugby world cup, or for Luis Hamilton to win the F1 world cahmpionship helped me to achieve this by going down the pub and drowning my sorrows instead !!

Anyway just uploaded this amendment (1.01), and it worked a treat after I deleted my test account avatar.

One thing I did notice however is that if selected to laod in avatars vertically, in Firefox these do not show, in IE they do. No errors generated.

It's still on a local server so can't show you the difference at present. Like I say when I upload it, I'll post the link.

I've got it on load horizontal for now and that does the trick, so a big thank you for this.

Regards

Lee
