
making a users\' list

Posted by nypx - 2008/01/09 18:58

Hi there again,

Ever since I've set up Moolet on my page my visitors are over the moon about it. There is a re-emerging question, however. 'Where can I see all the members?'. I saw that users'list here and I'm wondering how to set it up with all these avatars and so on... Please help me as this is the last thing my visitors (my students) need for their happiness.

Thanx in advance.

p.s. If any time you might need a Hungarian translation, of anything, feel free to let me know about it. I will be more than happy to lend you a hand...:D

bye: nypx

Do you mean the Member List or the Members with Avatars List?

They are done with "List Builder" that is part of Joomla Community Builder.

Take a peek at that, if you need help let me know and I will take a snap shot of my settings page.

I could use that translation yes!

I need to set up an area where folks can upload that stuff.

Brian

Well, I didn't know these were two different things. I thought these were only two different views of the same component... I will have a look at List Builder.
thx for the rapid answer... I'll be back soon.. :D

The component is Community Builder. See the attached as to the "List Management" menu. See if you have that.

admin > community builder > list management http://www.moolets.com/images/fbfiles/images/list_builder.gif

got it...
:D
now...if you could send me this snapshot about the settings... :D I'd be extremely grateful...
