Hello,

Love the map but getting errors in IE, the debugger say's

Source File: [http://www.google.com/intl/en\\_ALL/mapfiles/87/maps2.api/main.js](http://www.google.com/intl/en_ALL/mapfiles/87/maps2.api/main.js)

Line: 942

yep, that file causing the error is a google itself. There are hundreds of threads on the net about this error. Seems to be a bug in there code so it is up to them to fix. It did not seem to get in the way of my moolet working so I put it out there anyway. '

I will keep checking the google maps dev site for a fix from them

thanks

brian
